LETTERS TO THE EDITOR

Killed goose that laid golden egg

Sirs: The present Minister of Agriculture is to be commended for his advice on the reasons for the drop in egg prices. The public will be glad to hear over this time and time again.

We will remain united—especially in districts where the bad eggs have been found. We will continue to demand a complete eradication of the goose population. This will not only improve the quality of the remaining eggs but also save us from the nuisance of the geese flying around our farms.

Thank you for your support.

Cordwells, Poyls

What have they done to our pound?

Sirs: The recent market crash has caused a lot of concern among the farmers of our district. The farmers have been left wondering what has happened to their pound.

The pound has been affected by the global financial crisis, which has led to a decrease in demand for our products. Additionally, the recent weather conditions have also contributed to the loss of our pound.

The government has announced measures to support the farmers, including financial assistance and advice on how to improve productivity. We hope that these measures will help to stabilize the pound and prevent further declines.

We urge the government to continue to support the agricultural sector and to take the necessary steps to ensure the long-term sustainability of our farms.
